

Download Bronchial Asthma Nursing Management And Medication

Asthma is the result of chronic inflammation of the conducting zone of the airways (most especially the bronchi and bronchioles), which subsequently results in increased contractability of the surrounding smooth muscles. This, among other factors, leads to bouts of narrowing of the airway and the classic symptoms of wheezing. The narrowing is typically reversible with or without treatment. Start studying Nursing Care of the Child with Asthma. Learn vocabulary, terms, and more with flashcards, games, and other study tools. Asthma Management 2 CEUs By: Michael Stevens, PA-C, CRTT INTRODUCTION Co-Author, Louis Durkin, MD A two-hour course, covering the pathophysiology, mechanism, epidemiology, and treatment. The nursing care plan (NCP) for asthma focuses on preventing the hypersensitivity reaction, controlling the allergens, maintaining airway patency and preventing the occurrence of reversible complications. Here are seven (7) nursing care plans (NCP) for bronchial asthma.
