"Chicken Boy: The Amazing Adventures of a Super Hero with Autism" is a well written book aimed at children to explain what autism is. Most books written for children (and adults) to explain autism are from a parent's/teacher's/psychologist's perspective. Chicken Boy is made possible because of the partnership with MeeGenius (acquired by Houghton Mifflin Harcourt in 2015). Book one was the MeeGenius Author's Challenge People's Choice winner. Chicken Boy: The Amazing Adventures of a Super Hero with Autism When we open the book, we meet a young man who tells us that he has a superhero inside his head that he calls Chicken Boy. Chicken Boy comes out whenever the boy eats chicken fingers, ketchup and french fries. The boy explains that he has autism, which is a fancy word for him living inside his own brain.
