Our Work. We're extremely proud of the the passion, hard work, and craftsmanship we put into every game we create here at Harebrained Schemes – and we're committed to trying to make each new project even better than the last. Phishing explained. Phishing scams are typically fraudulent email messages appearing to come from legitimate enterprises (for example, your university, your internet service provider, your bank). These messages usually direct you to a spoofed website or otherwise get you to divulge private information (for example, passphrase, credit card, or other account updates). Challenging and Innovative Programmes of Learning. Pupils progressively develop knowledge that is meaningful to them through themed programmes of learning. Schemes. A variety of version numbering schemes have been created to keep track of different versions of a piece of software. The ubiquity of computers has also led to these schemes being used in contexts outside computing.
