Wanted!!! current and out of print books, manufacturers catalogs, service manuals, parts guides, dimension sheets, technical papers and related documentation pertaining to marine and industrial gear reducers, gearing, gear design, gear theory, gear manufacturing and gear manufacturing machinery. What is a Gearbox?. A gearbox is a mechanical device utilized to increase the output torque or change the speed (RPM) of a motor. The motor's shaft is attached to one end of the gearbox and through the internal configuration of gears of a gearbox, provides a given output torque and speed determined by the gear ratio.
