Custom Course Design and Development in Engage. Wiley worked with Jack to devise a digital course solution in Wiley's LMS platform, Engage. After conducting a needs assessment to establish a course design, we created a simplified learning path for students. A typical soil is about 50% solids (45% mineral and 5% organic matter), and 50% voids (or pores) of which half is occupied by water and half by gas. The percent soil mineral and organic content can be treated as a constant (in the short term), while the percent soil water and gas content is considered highly variable whereby a rise in one is simultaneously balanced by a reduction in the other.
