

# **Download Pregnancy And Parenting A Health Care For Women International Publication**

Medical checkups and screening tests help keep you and your baby healthy during pregnancy. This is called prenatal care. It also involves education and counseling about how to handle different aspects of your pregnancy. Pregnancy Help supports the wellbeing of pregnant and recently pregnant women, parents, caregivers and their families/whanau by providing information and practical support with Care, Concern and Confidentiality. Obstetrics is the field of study concentrated on pregnancy, childbirth, and the postpartum period. As a medical specialty, obstetrics is combined with gynecology under the discipline known as obstetrics and gynecology (OB/GYN) which is a surgical field. Women with cystic fibrosis (CF) now regularly survive into their reproductive years in good health and wish to have a baby. Many pregnancies have been reported in the literature and it is clear that whilst the outcome for the baby is generally good and some mothers do very well, others find either their CF complicates the pregnancy or is adversely affected by the pregnancy.
