

Download Remediation Of The Struggling Medical Learner

Remedial Teaching in Medical Education: Find success for all of your medical learners. Jeannette Guerrasio, MD is a nationally and internationally known expert in the remediation of struggling medical resident, and fellows, as well as medical, nurse practitioner, physician assistant, physical therapy, occupational therapy and optometry school students. Additionally, the Struggling Learner department supplies members with resource lists, newsletters, helpful articles, and much more. Through our "Find A Professional" searchable database, members may search for private professionals in their area to assist in testing, progress monitoring, designing teaching plans, therapy, and other specialized assistance. Dynamo Maths for Grades K-5, is a multisensory program that adapts instruction to learner's needs. It is based on brain research on math learning and addresses learning disorders and poor working memory. Age 4-11+. Over 230 online activities and supports: Teacher Class/Parent Activity Plans, Printable Worksheets, and Progress Reports & Certificates. Language-related issues for international adoptees and adoptive families . Published in: T. Tepper L. Hannon D. Sandstrom (Eds.).
