

Download Rss Feedl

RSS Feed Readers and News Aggregators Feed Reader or News Aggregator software allow you to grab the RSS feeds from various sites and display them for you to read and use. A variety of RSS Readers are available for different platforms. Instead of checking back every day to any particular site to see if it's been updated, RSS feeds give users the ability to simply subscribe to the RSS feed, much like you would subscribe to a newspaper, and then read the updates from the site, delivered via RSS feeds, in what's called a "feed reader." RSS (Rich Site Summary; originally RDF Site Summary; often called Really Simple Syndication) is a type of web feed which allows users to access updates to online content in a standardized, computer-readable format. These feeds can, for example, allow a user to keep track of many different websites in a single news aggregator. We take care of all the rest by automatically generating and updating your RSS podcast feed and producing a dynamic website that includes a list of your most recent podcasts, a podcast archive, and a streaming media player.
