

Download Study Guide For Vascular Intervention Registry

Background Peripheral vascular disease (PVD) stems from restriction of blood flow in vessels that lead to the extremities (i.e., arms and legs) as well as internal organs (e.g., kidney and stomach). The safety and scientific validity of this study is the responsibility of the study sponsor and investigators. Listing a study does not mean it has been evaluated by the U.S. Federal Government. BIOLUX P-III is a prospective, international, multi-centre, postmarket all-comers registry to collect clinical performance data on the Passeo-18 Lux paclitaxel releasing balloon catheter in the treatment of atherosclerotic disease of the infrainguinal arteries. Study Patients. Patients were eligible for the study if they were scheduled for an elective vascular operation for either an expanding abdominal aortic aneurysm or severe symptoms of arterial ...
